## 1.0 - Overview

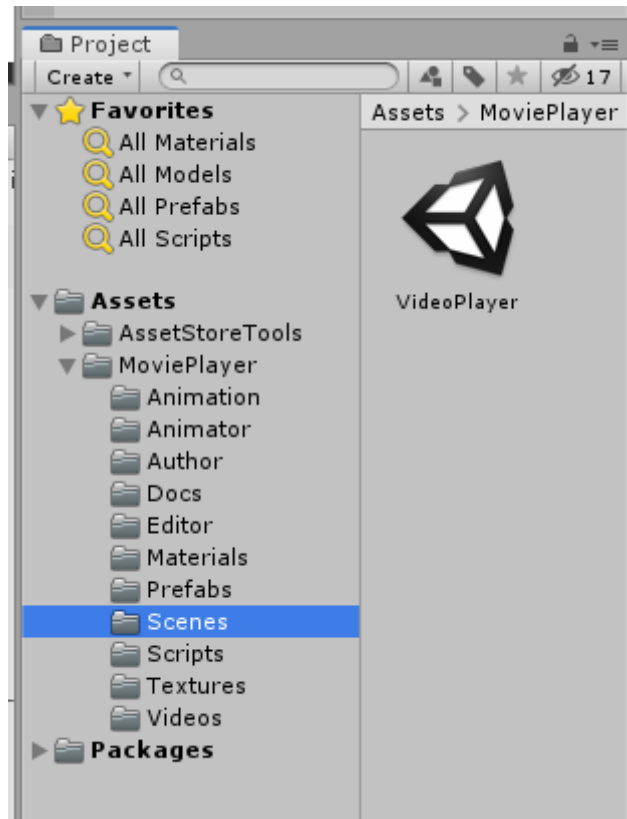

The following figure below describes the main parts in the video player scene:

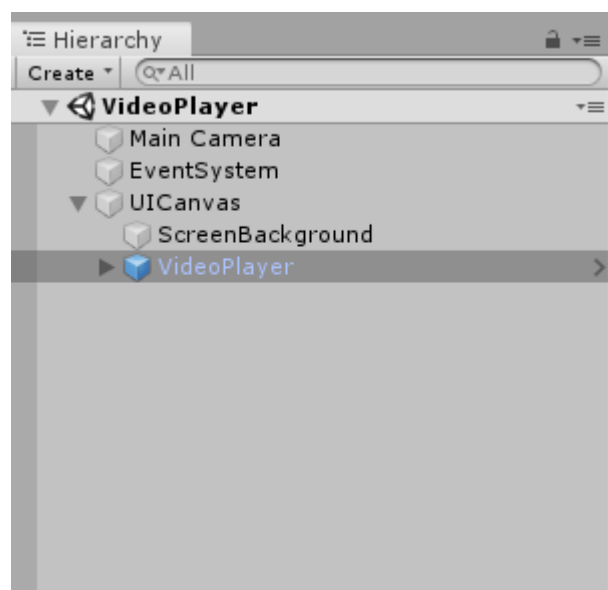

1. RawImage - The raw image of the video player
2. Loop Button- Whether to set the video list as loop or not.
3. Shuffle Button - Whether to select random video or not.
4. Full Screen Button - Whether to fill the screen or not.
5. Previous Video Button - Change to the previous video.
6. Pause Video Button - Pause the current video.
7. Stop Video Button - Stop the current video.
8. Next Video Button - Change to the next video.
9. Music Video - Video slider.
10. Sound Level Slider - Controls the audio volume of the video.

## 2.0 - Video Manager (Manage Your Clips)

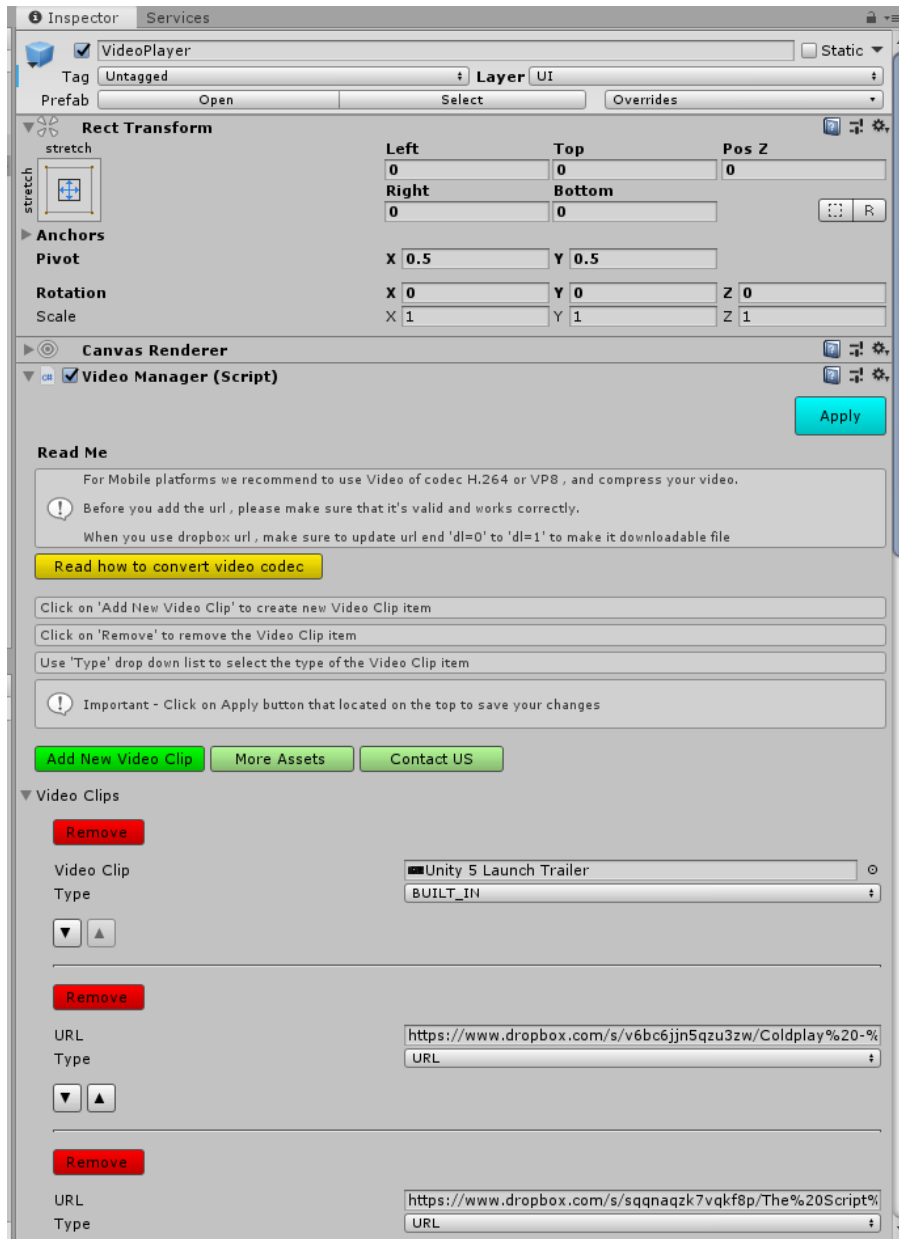

- Open Video Player scene

- Select Video Player Game Object, then you can Add/edit your videos in the Video Manager component

- Important - Read the notes in the component

- Important Step - Click on Apply button to save your new changes

Using 2018.3 or Higher you will see custom Apply button instead

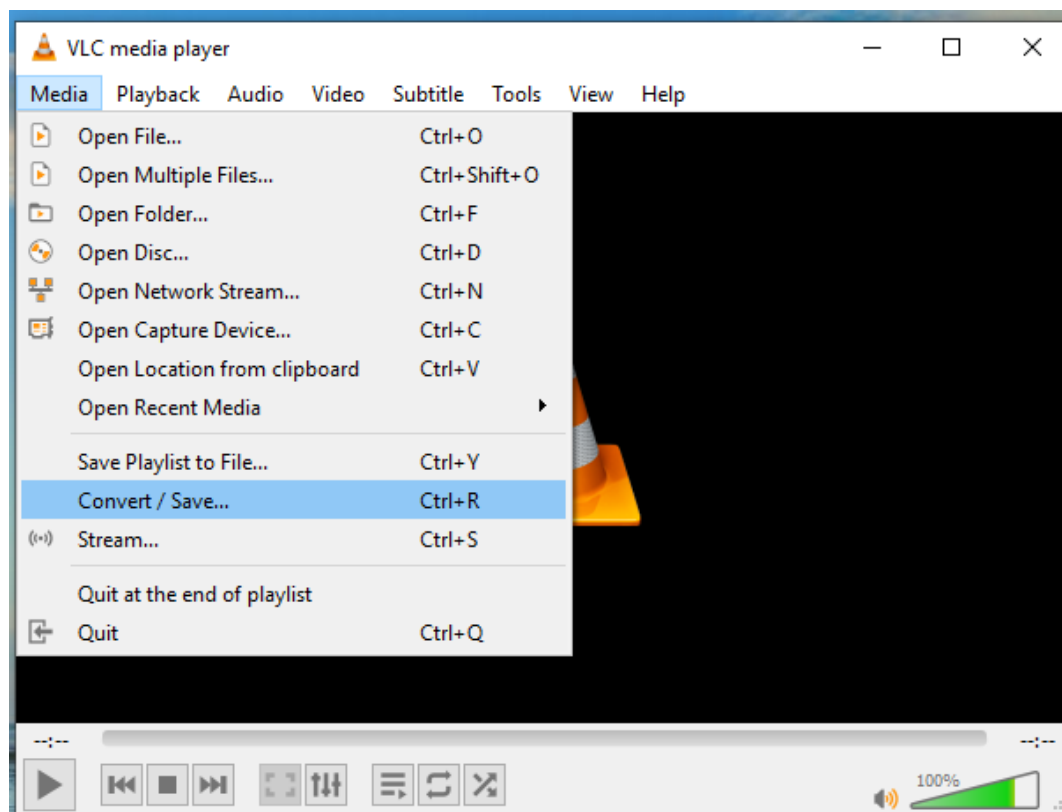

## 3.0 - Convert Video Codec (URL Streaming)

If you would like to stream your videos from a URL, you need to convert your video codec and then upload it into your server or clouds (such as dropbox) and then get the link/url for the video (must be downloadable link)

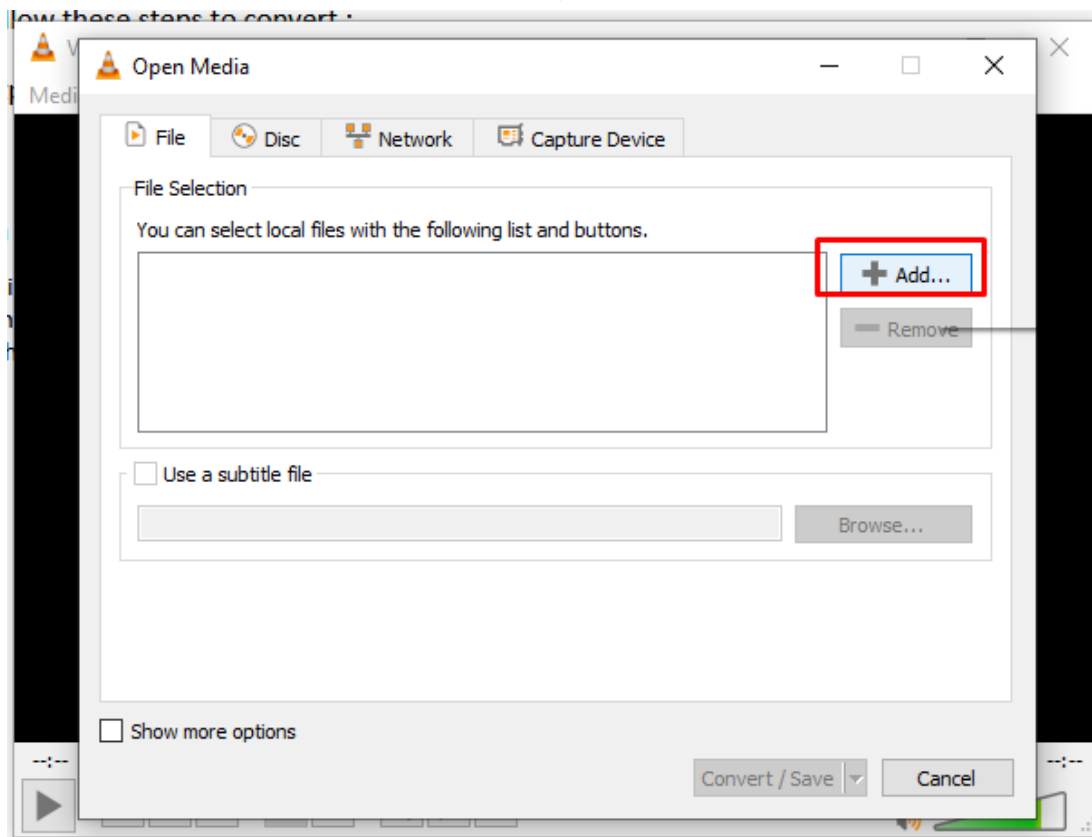

When you use dropbox url , make sure to update url end 'dl=0' to 'dl=1' to make it downloadable file

Follow these steps to convert:

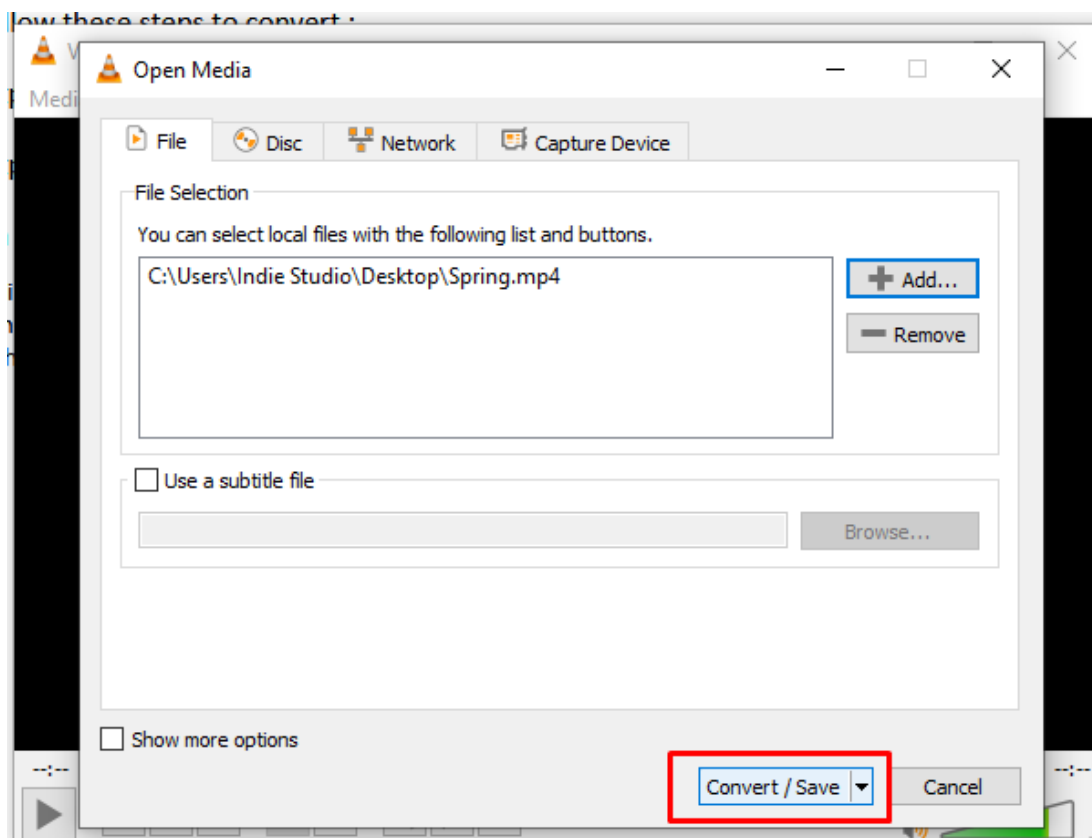

1. Make sure you have/ download [VLC media player](#)
2. Open it , then select **Media -> Convert/Save**

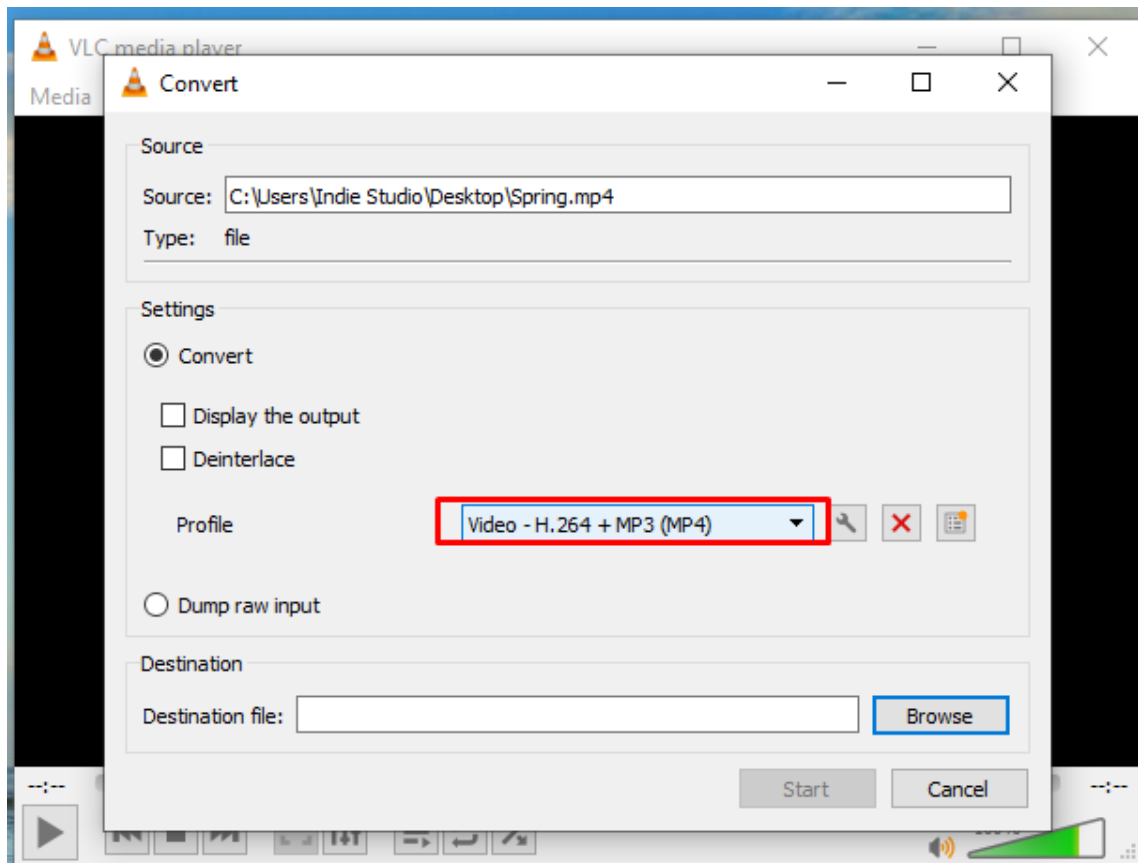

3. Click Add and then select your video

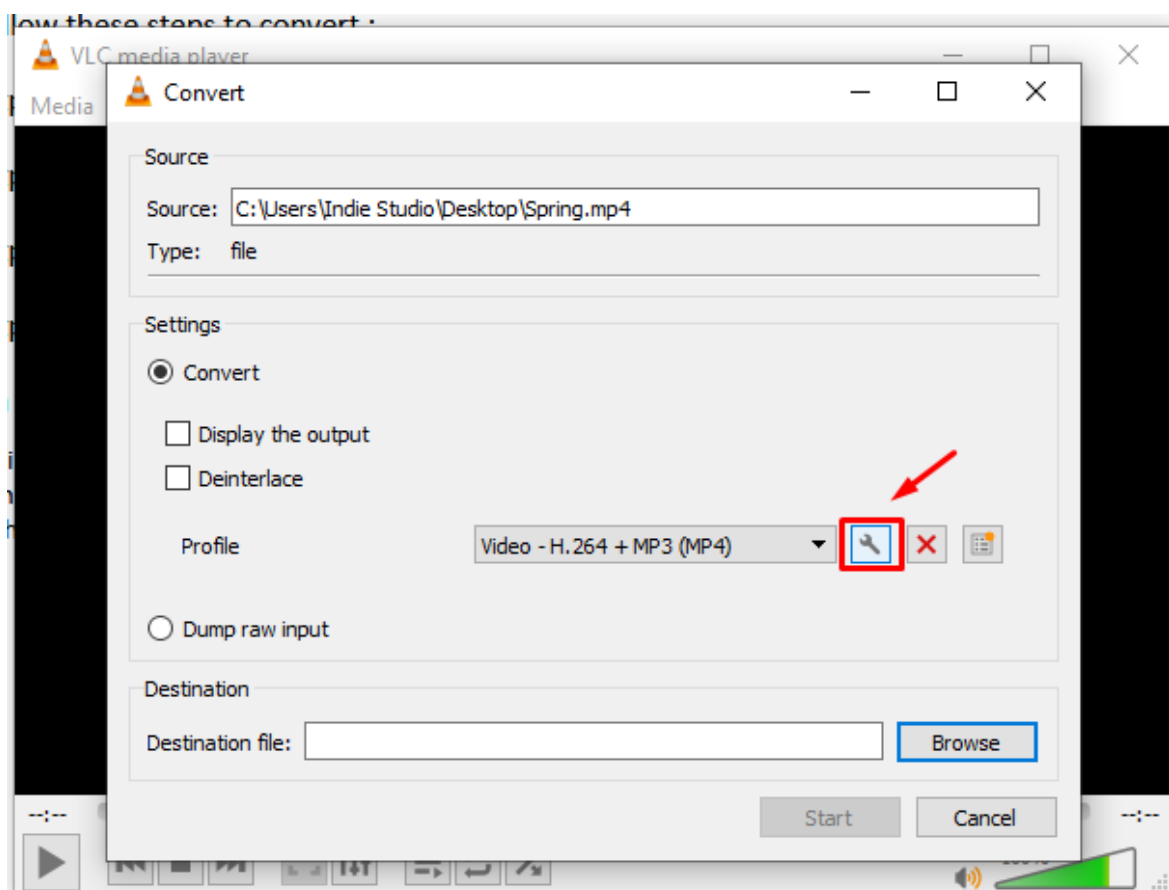

4. Click Convert/Save

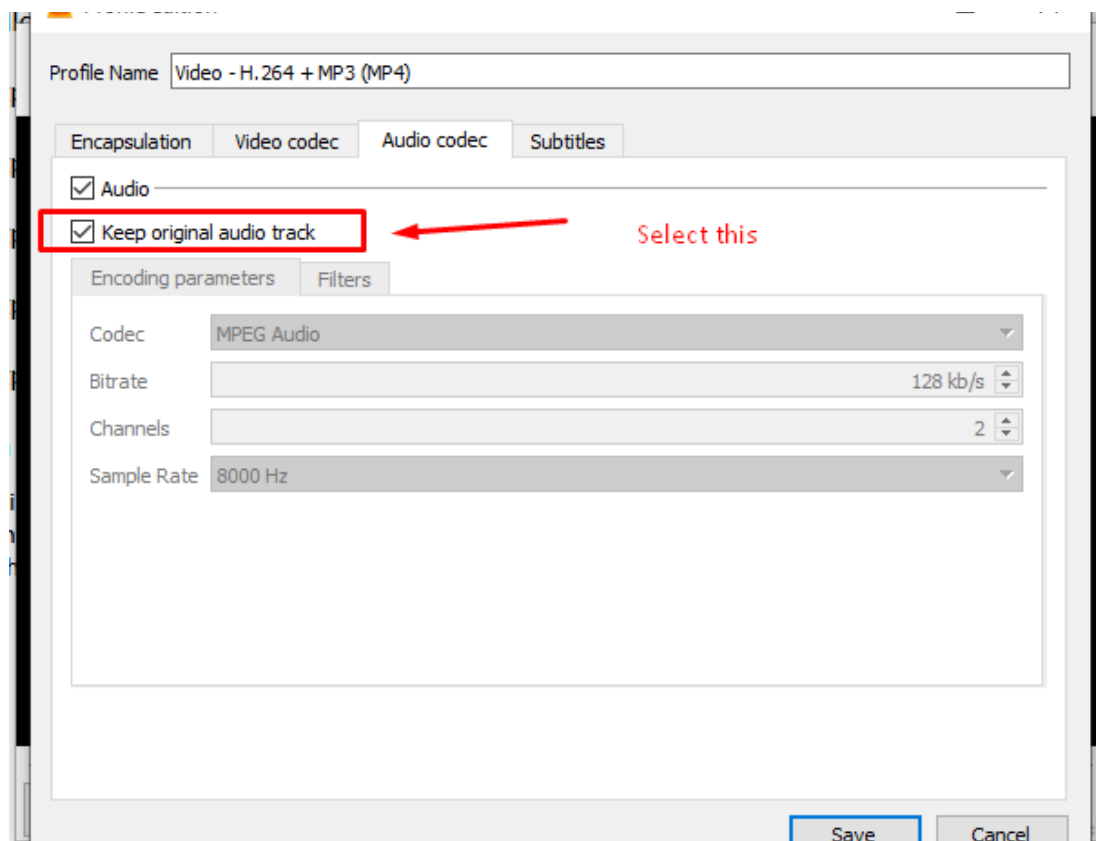

5. From Profile select Video - H.264 + MP3(MP4)

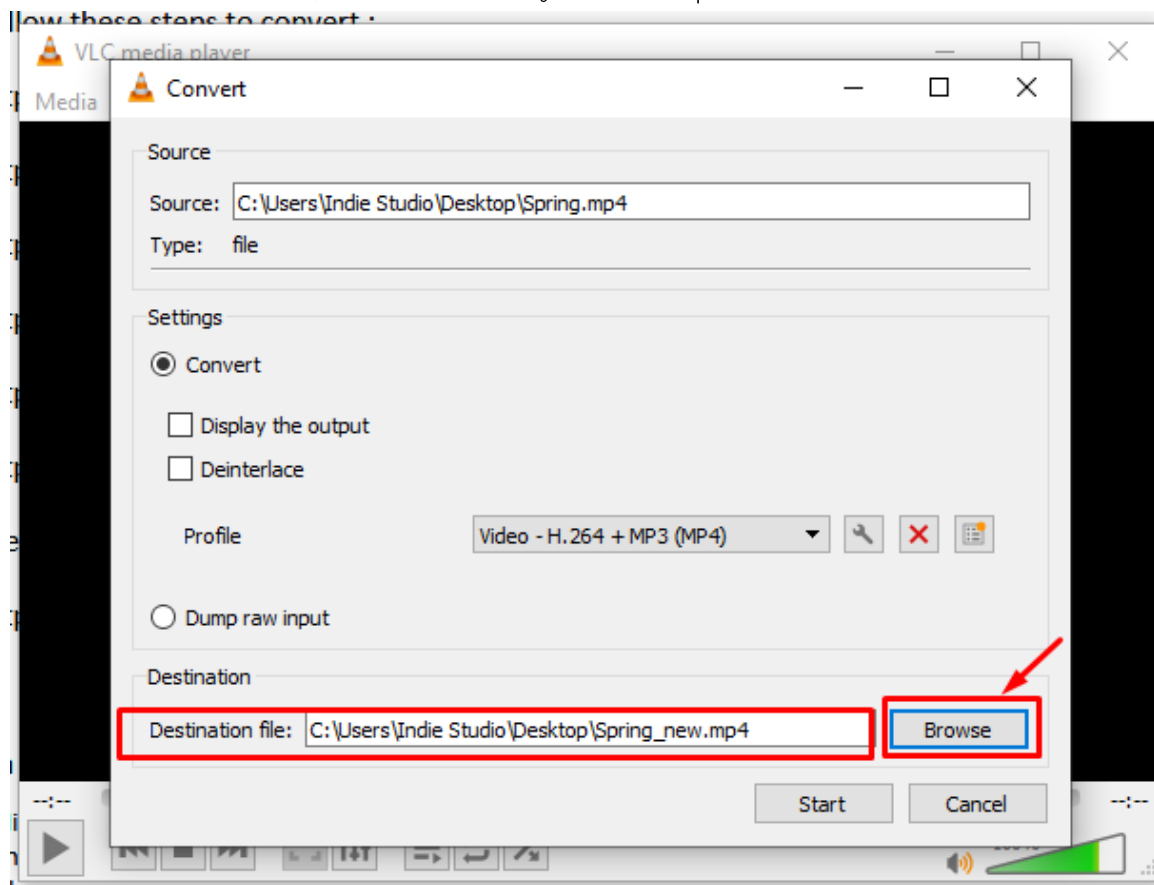

6. Then click on the settings icon

7. Make sure Keep original audio track is enabled then click Save

8. Click Browse , then name your clip

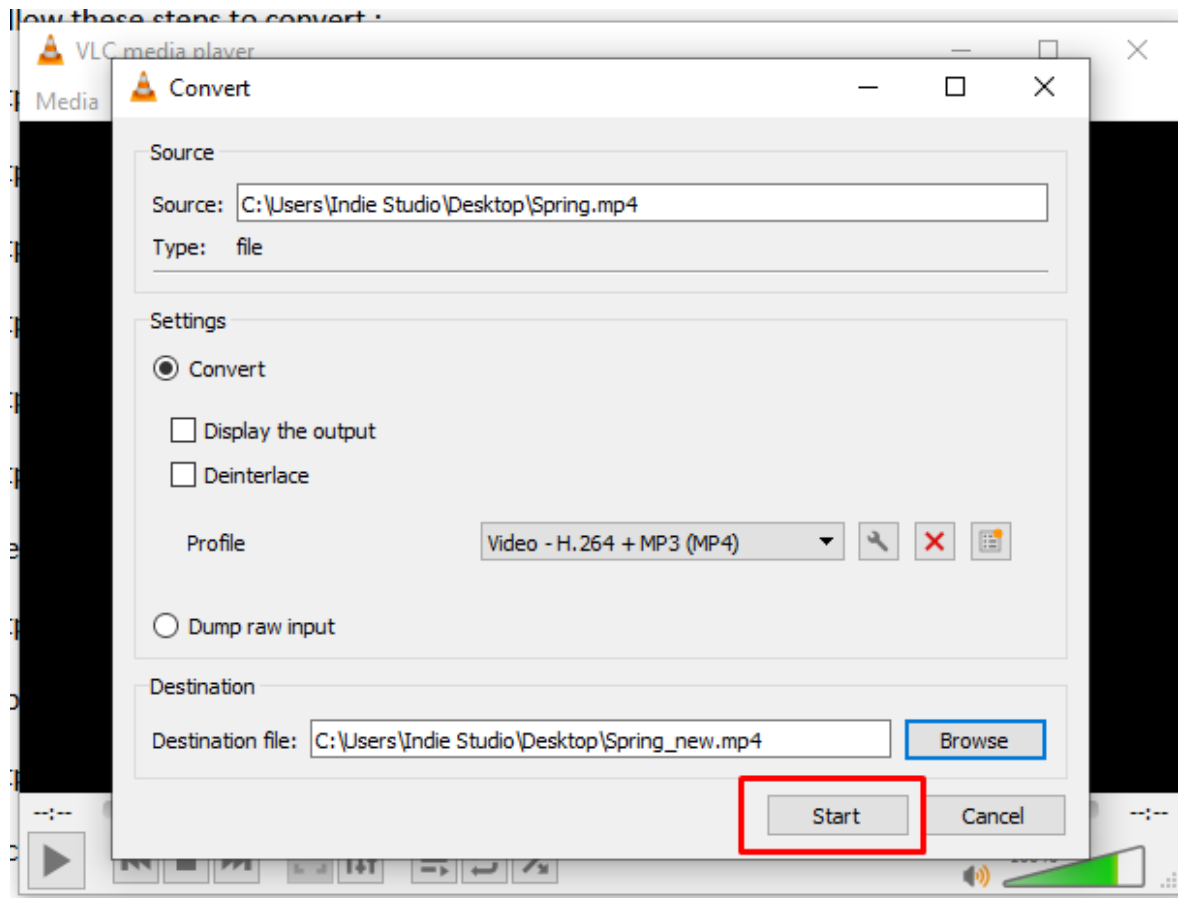

they are:

1. First your local video clip file, the same inside the package

## 9. Click Start

Wait until convert is done, then upload your video to your server/clouds (Dropbox), and finally add your URL in the Video Manager component and test it.

## 4.0 - More Details

---

If you have more questions, suggestions, comments, feature requests or bug detected, you can contact us and we would be happy to listen from you.
